Introduction:

This course provides participants with essential knowledge and practical understanding of Dangerous Goods Regulations (DGR) to ensure safe handling, storage, transportation, and compliance with legal requirements. The training covers classification, labelling, documentation, and emergency response related to dangerous goods in the workplace and during transport.

Training Methodology:

Interactive lectures, case studies, group discussions, practical exercises, quizzes, and scenario-based learning

Objectives:

- Understand the fundamentals of Dangerous Goods and their hazards
- Identify and classify dangerous goods according to regulations
- Learn correct packaging, labelling, and marking requirements
- Understand documentation and compliance obligations
- Apply safe handling, storage, and emergency response procedures

Benefits:

- Improve compliance with Dangerous Goods Regulations
- Reduce risks related to handling and transportation of hazardous materials
- Enhance workplace and transport safety awareness
- Understand legal responsibilities of employers and workers

Course Outline

Introduction to Dangerous Goods Regulations

- Overview, regulations, responsibilities, and consequences of non-compliance
