info@perintosh.com

Introduction:

Participants will gain a comprehensive understanding of the structure, principles, and requirements of both standards, as well as the auditing techniques needed to evaluate compliance and system effectiveness. The course focuses on the integration of occupational safety, health, and environmental management systems, enabling organizations to improve operational performance, reduce workplace risks, minimize environmental impacts, and ensure continual improvement through systematic internal audits.

Training Methodology:

Interactive lectures, case studies, group discussions, scenario-based exercises, and practical workplace compliance exercises.

Objectives:

- Understand the principles and requirements of ISO 45001 and ISO 14001 management systems.
- Interpret the clauses and key elements of both standards.
- Understand the role and responsibilities of an internal auditor.
- Plan, conduct, report, and follow up on internal audits effectively.
- Identify non-conformities, risks, and opportunities for improvement.

Benefits:

- Improved compliance with occupational safety, health, and environmental regulations.
- Enhanced capability to maintain and improve ISO management systems.
- Strengthened internal audit processes to identify system gaps and improvement opportunities.
- Reduction of workplace incidents, environmental impacts, and operational risks.

Course Outline

Introduction to Management Systems and ISO Standards

- Management systems, ISO standards, risk-based thinking, and continual improvement

Understanding ISO 45001 Requirements

- ISO 45001 requirements, hazard control, leadership, and OSH performance

Understanding ISO 14001 Requirements

- ISO 14001 framework, environmental risks, compliance, and monitoring

Integrated Management System (IMS) Approach

- ISO 45001 & ISO 14001 integration, documentation, and system alignment

Internal Auditing Principles and Guidelines

- Audit principles, auditor roles, ethics, and evidence-based auditing

Audit Planning and Preparation

- Audit scope, planning, checklist, and risk identification

Conducting Internal Audits & Reporting

- Audit execution, findings, reporting, and corrective actions
