Introduction:

Scheduled waste, if improperly managed, can pose serious risks to human health and the environment. This course provides participants with practical knowledge and skills to manage, handle, store, and dispose of scheduled waste in compliance with Environmental Quality (Scheduled Wastes) Regulations 2005. It emphasizes safe practices, legal compliance, and environmental responsibility.

Training Methodology:

Lecture with visual aids, case studies, practical exercises, and group discussion

Objectives:

- Understand the definition and classification of scheduled waste
- Learn legal requirements for scheduled waste management
- Apply safe handling, storage, and disposal method
- Develop skills to implement a scheduled waste management system in the workplace

Benefits:

- Gain knowledge on scheduled waste types, handling, and storage
- Learn procedures to reduce environmental and occupational risks
- Understand regulatory compliance requirements
- Promote sustainable and safe waste management practices

Course Outline

Legal Requirements & Compliance

- Follow the laws and know your legal duties

Classification and Identification of Scheduled Waste

- Know your waste types and label them correctly.

Handling, Storage, and Transportation

- Separate, store, and move waste safely with proper paperwork

Disposal Methods and Treatment Options

- Recycle or dispose of waste using licensed facilities

Scheduled Waste Management System

- Keep records, report data, and continuously improve your internal process
